

AGORA SEARCH INSTANTLY LOCATE ANY REPORT

About

Having trouble finding a report? Forgot the name of a report? Need to find all reports on a given topic?

Meet Agora Search. A search tool to locate reports and dashboards across your enterprise BI environment. Agora Search works with most reporting applications such as Tableau, Microsoft PowerBI, MicroStrategy, Qlik, TIBCO Spotfire, etc.

Unparalleled Results. Unlike the built-in search function of most BI applications, Agora scans the entire report content including tags, captions, fields, and even tooltips to deliver most comprehensive search results.

Who needs this?

Organizations with:

- Vast number of reports and dashboards
- Functional or reporting silos
- One or more BI applications

Features

- Easy and intuitive UI
- One-time simple setup
- Cloud or on-premise installation
- Battle-tested on library with over 10,000 dashboards
- Safe and secure: report access based on user entitlement and SSO (Single Sign On) compliant
- Built on next-gen Open Source technology stack
- Real-time indexing
- Seamless integration with existing applications
- Save, share and tag search queries
